

# Merkur-Aqtobe LLP

Building what you need.

Where you need it.

How you need it.

# We are Merkur-Aqtobe!

We are a team of enthusiastic professionals who have worked for many years in various fields of construction industry in many countries and finally decided to combine our knowledge, skills and experience to reach new frontiers.

We have been gaining this experience at various scale projects in Kazakhstan, Russia, Italia, Turkey, Nepal, South Africa.

Now we are pleased to offer the distilled essence of these years of experience to our Customers and use further slides to describe its practical application and what distinguishes us from our peers.

# Our Specialties

We hold Category 3 license for Construction and Installation Works under the legislation of the Republic of Kazakhstan and work to upgrade it to Category 2.

Alongside with the full capacity to perform all activities permitted under the License, we would emphasize our Specialties that we view as a perfect opportunity to offer our Customers the entire range of our Services and products that we are particularly proud of. The Specialties include, but not limited to, the following:

1. [Civil Works](#)
2. [Electrical Works](#)
3. [Hydrotesting and Pipe Cleaning](#)
4. [Unique Production Approach](#)

We are happy to provide more detail about each one, whether by scrolling down or following a direct link to the respective section.

# Civil Works

Our Civil Team management gained vast experience in all practical aspects of Civil Works planning, scheduling, estimation, procurement, execution, quality control, commissioning and acceptance. Working for both government and privately owned entities, the Team consistently achieves success through a state-of-the-art approach combining the most meticulous conformance to the Customer specifications and the deep and ever growing industry knowledge.

One of the key contributors to that is our Civil and Structural Design Team that can provide immediate high quality field engineering support to ongoing projects. As all other our resources, this function is expandable as may apply.

# Civil Works. Continued

In terms of craft we enjoy the benefit of the close-knit team, where each member is valued and respected, cognizant of safety, work discipline and quality requirements and consciously and consistently abides to such requirements. Average industry experience is 10 years.

As to the construction equipment, we have immediate duly secured access to the entire range of any equipment types that may be required or needed for construction in the appropriate quantities thereof.

Again, these resources may be expanded to meet a specific project need as applicable.

# Civil Works. Continued.

Successful projects where either the entire Civil Team or its Design Sub-Group were involved, include, to name a few:

1. Aqtobe State Medical Academy Renovation
2. Aqtobe Air Port Upgrade
3. Kazakhstan National Power Grid Operator (KEGOC) Aqtobe Office renovation
4. Aqtobe State University named after K. Zhubanov
5. Municipal Administration (Akimat) of Alga town

and many other.

Should you look forward to receive more information regarding our Civil Team capabilities, we would encourage you either to scroll down or follow the direct link to [Contacts](#).

# Electrical Works

Electrical Team within the structure of Merkur-Aqtobe was formed to ensure the best level of service for our Customers through allocating dedicated resources that have been steadily developing in this highly responsible and complex area of expertise.

Earlier completed scopes have been mostly associated with the construction of overhead lines up to 1000 V and above, sub-stations, cathodic protection, external lighting networks, although we are in full possession of the capacity to perform all Electrical Works permitted under our current License and its planned upgrade.

# Electrical Works. Continued

In full consistence with its purpose, the Electrical Team has dedicated staff and craft resources.

The team management possesses vast successful experience in numerous international projects, both in the Republic of Kazakhstan and abroad, and is fully aware of all details of combining Kazakhstan and international standards to the best interest of our Customers.

Experienced craft and all appropriate tooling and equipment are also available in numbers adequate for the execution of any activities conformant to our current License.

# Hydrotesting and Pipe Cleaning

One of several features that do distinguish Merkur-Aqtobe from our competitors, is our Hydrotesting and Pipe Cleaning Team.

This feature enables us to function in the dual capacity of a construction company and a service company, offering our Customers the advantage of long standing mutually beneficial relations with well known high quality level.

The team management possesses decades of experience in various cross-country pipeline and processing facility projects, involving construction, hydrotesting, pigging and all other related operations.

# Unique Production Approach

Another feature that strongly distinguishes Merkur-Aqtobe, is our thoroughly contemplated and designed approach to pricing, work planning, batching, batch scheduling, execution and continuous improvement based on real-time lessons learnt.

This approach, based on the combination of many years of experience and intrinsic knowledge of Lean 6 Sigma methodology, can be considered our state-of-the-art know-how, enabling very high cost efficiency through:

- 1) realistic reliable scheduling and planning;
- 2) resultant prevention of schedule and budget overruns.

Such combination enables us to act in the best interest of our Customers and achieve our goal of building the trust relationship with all our Clients.
